## Suicide Warning Signs

These are common warning signs that someone is at risk of suicide:

- ❖ Threatening to hurt or kill him or herself, or talking about wanting to hurt or kill him or herself.
- ❖ Looking for ways to kill himself or herself by seeking access to firearms, pills or medications, or other means.
- ❖ Talking or writing about death, dying or suicide when these actions are out of the ordinary for the person.
- ❖ Acting recklessly or engaging in risky activities—seemingly without thinking.
- ❖ Experiencing dramatic mood changes.
- ❖ Expressing feelings of purposeless or seeing no reason for living.

*Information is from the American Association of Suicidology*

## Who is at Risk of Suicide?

The people most at risk of committing suicide are those who:

- ❖ Have attempted suicide in the past;
- ❖ Feel hopeless, worthless, trapped or intolerably alone;
- ❖ Have become isolated from friends, family, society and support systems;
- ❖ Have been exposed to the suicide of another person;
- ❖ Have increased their use of alcohol or are binge drinkers;
- ❖ Have a history of violent behavior;
- ❖ Are not receiving the mental health care they need; and/or
- ❖ Have a firearm or other means in the home.
