Care Coordination Frequently Asked Questions

1. **How do I become a care coordinator for the Alaska Medicaid long term home and community based service options?**

Medicaid is an entitlement program created by the federal government. It is the primary public program for financing basic health and long-term care services for low-income Alaskans. Senior and Disabilities Services works in partnership with community providers to assist them to provide long term care in our communities. As a Care Coordinator either establishing or working for a care coordination agency you will need to be certified through Senior and Disabilities Services. The Care Coordination agency must be enrolled as a provider with Alaska Medicaid. The Care Coordination agency will need to apply for HCBW provider certification using the certification application documents here: http://dhss.alaska.gov/dsds/Pages/info/approvedforms.aspx The Certification application and its requirements have been adopted in regulation (7 AAC 130.220) therefore they are regulatory requirements. You can see information about how to apply for certification here http://dhss.alaska.gov/dsds/Documents/docs/WaiverCertFAQs.pdf

In order to apply for certification, you must first complete required care coordinator training. Please see the training website for the latest schedule of training: http://dhss.alaska.gov/dsds/Pages/ops/senior-disabilities-servicetraining.aspx. You must also attend Critical Incident Reporting training, and any other training required for the service you intend to provide. Upon review and approval of your certification application packet, SDS issues a certification approval letter. Then you will apply for enrollment as a Medicaid provider (of Care Coordination). Enrollment requires completing provider agreement forms and additional training with Alaska Medicaid.

2. **What is a list of all the trainings I must take if I am just starting out and want to form my own care coordination agency?**

1. Basics of Care Coordination (with Alaska Training Cooperative)  
2. Critical Incident Reporting Webinar (with SDS)  
3. CCCORE Course 1, 2 or 3 (with SDS)  
4. Provider enrollment courses (With Conduent - Alaska Medicaid’s fiscal agent)

3. **What kind of education and experience do I need to apply to become a certified and enrolled provider?**

SDS requires verifiable education and/or experience in human services and closely related fields (such as nursing or psychology) for all applicants seeking certification for Care Coordination. Care Coordinator Program administrators must also have supervisory experience working in these fields. The requirements for Care Coordination, including specific levels of required education and experience, are listed in the certification application packet and Care Coordinator Conditions of Participation.

4. **What is human services and what are the closely related fields?** Human services is an interdisciplinary study with the objective of meeting human needs through an applied knowledge base, focusing on prevention as well as remediation of problems, and maintaining a commitment to improving the overall quality of life of service populations. Closely related fields: Anthropology, Art/Dance Therapy, Audiology, Child Development/Family Relations, Community Mental Health, Chemical Dependence Administration, Counseling/Guidance, Criminal Justice, Divinity/Religion/Theology, Drama Therapy, Education, Gerontology, Health Administration, Health Education, Marriage and Family Therapist, Case Manager, Music Therapy, Nursing/Medicine, Nutrition, Occupational Therapy, Pastoral Counseling, Physical Therapy, Psychology, Recreational Therapy, Rehabilitation Counseling, Social Work, Sociology, Special Education, Speech Pathology, Vocational Counseling, Probation Officers, Intellectual and Developmental Disabilities.

5. **I’ve never written a job description before. Do you have templates for the business documents you require in the application packet?**
No. These documents are part of the business responsibilities of the provider. If you need help with business development you can check the Alaska Small Business Development Center Website.

6. What responsibilities do care coordinators have?

Care coordinators assist individuals who are eligible to receive community based long term supports in gaining access to needed waiver and other state plan services, as well as needed medical, social, and other services, regardless of the funding source for the services to which access is gained.

As a provider you are working to deliver Medicaid HCBW and/or Personal Care Assistance services in our communities. You are responsible for supporting the best possible health and safety of the people you are serving through statutory, regulatory, and policy requirements. You are responsible for carrying out the service for which you are approved according to regulations found in Title 7, Health and Social Services, Part 8, Medicaid Coverage and Payment, 7 AAC 105 through 7 AAC 165, and all referenced Alaska Statutes. You will initiate and maintain any licensure, permits, compliance with zoning, and/or education/training requirements associated with the service you are providing even if these requirements are not overseen by Senior and Disabilities Services (for example, a nursing license). You are responsible for correct Medicaid billing and record keeping practices. You will also renew your certification as a provider as required by Senior and Disabilities Services.

7. What is the demand for Home and Community Based Medicaid Waiver Care Coordinators in Alaska?

We can’t answer this specifically although you can research the rising need for long term healthcare services: http://labor.alaska.gov/research/index.htm It doesn’t list “Care Coordinator” as a separate job but the closest is healthcare support/assistance or social services.

8. Is Care Coordination a licensed profession?

No. A care coordinator needs to be certified by SDS and enrolled in Alaska Medicaid. The care coordinator must renew his or her certification and enrollment. It is not a license.

9. How long does it take?

Allow 4-6 months for the entire process beginning to end.

10. Is there a charge for the classes?

SDS classes are tuition free. AKTC partnership trainings have a fee which you pay to AKTC. There is a $564.00 enrollment fee paid to apply for enrollment in Alaska Medicaid (Conduent).

11. What are the requirements to take the self-paced course?

SDS Training is not offering entirely self-paced care coordinator training at this time. See CCCORE Course 3 for care coordination training with a partial self-paced curriculum choice.

12. What is enrollment? Enrollment is when a care coordinator administrator registers with Alaska Medicaid as a provider. You must take additional training from Alaska Medicaid prior to enrolling as a Medicaid provider.

13. What computer skills do I need? You should know how to: have a professional email address that is easy to remember, we suggest to use your name or your business name as part of the email address; use email that accepts attachments; open email messages and attachments; save documents to files in your computer; attach documents to email messages; and open, read, modify, and save changes to documents in the most current versions of Microsoft Word or Open Office, and Adobe Acrobat Reader. You should have basic working knowledge of Protected Health Information (PHI) and how to work with digital and paper documents under HIPAA rules. You should have basic knowledge of working with secure websites that require you to create a unique username and
password. Please note that if you are using a “Hotmail” email address, we are finding that the SDS email system has trouble sending email with attachments to Hotmail addresses. Webinars will not work for “AOL” email addresses. Please consider establishing a new professional email with another service such as but not limited to “Gmail”. If you want to attend SDS webinars, please check your computer system here to see if it is compatible.
