About the data in this report

This report summarizes statistics for child Protective Service Reports (PSR) received by Alaska's Office of Children's Services (OCS), including their screening status and the demographics of alleged child victims and alleged perpetrators. PSRs are documented reports of alleged maltreatment to children.

To protect the privacy of individuals in low-count groups, screening status regional breakouts are not included for monthly reporting periods.

For this report time periods are assigned based on administrative acceptance of PSR screening decisions. Allegations of maltreatment are required to be screened-in or screened-out within seven days of PSR receipt.

Each PSR may report multiple alleged occurrences of maltreatment. Each allegation within a PSR matches one victim to one perpetrator for one maltreatment type.

Counts of alleged victims and alleged perpetrators are unique; that is, alleged victims or alleged perpetrators are counted only once per maltreatment per region per period. Individuals counted as screened in are not duplicated in screen out counts. However, some individuals may be duplicated between maltreatment types or between regions. Therefore, regional demographic counts may not add to Alaska totals.

Counts of Initial Assessments (IA) are also presented here, although many will not yet be finalized for recent periods. An IA may include multiple PSRs during the reporting period, which may be from different regions. Additionally, cases may have multiple PSRs and/or IAs during the reporting period. Therefore, regional IA and case counts may not add to Alaska totals.

Age calculations are based on the time of Protective Service Report screening acceptance. Where multiple reports were received the earliest report of maltreatment is used for age calculation. Ages are grouped in three-year increments to protect the privacy of individuals in low-count groups.

Native Status is determined by reported race of either Alaskan Native or Native American.

Subsequent reports covering the same reporting periods will contain updated statistics.

OCS Reported Maltreatment Web Report Field Definitions

Allegation - Child abuse statements and/or descriptions by a reporter that consist of one Alleged Perpetrator, one Alleged Victim, and one of the four types of Maltreatment.

Alleged Perpetrator - An Initial Assessment participant alleged of maltreating an Alleged Victim.

Alleged Victim - Child about whom a report regarding Maltreatment has been made.

Case - A household unit included in one or more Initial Assessments.

Initial Assessment (IA) - An evaluation of child safety completed for each screened in PSR. The IA process consists of gathering sufficient information (via face-to-face interviews with the alleged victim, family members and collateral contacts) to determine if a child is safe or unsafe and determining the finding for each allegation (Substantiated or Not Substantiated). A determination is also made as to whether the children and/or other persons involved in the report of alleged maltreatment are in need of services. An IA may include multiple PSRs.

Maltreatment - An act or omission that results in circumstances in which there is reasonable cause to suspect that a child may be a child in need of aid, as described in Alaska Statute 47.10.011; an injury and/or damage to a child's physical or mental well-being. Alaska divides maltreatment into four types: Mental Injury, Neglect, Physical, or Sexual. Please refer to next page for elaboration on each type.

Native Child - Any mention of Alaska Native or American Indian race.

Office of Children's Services (OCS) - A division of Alaska's Department of Health and Social Services.

ORCA - Online Resources for the Children of Alaska, OCS's main database.

Protective Service Report (PSR) - A report of child Maltreatment. A PSR may contain multiple Allegations, each of which consists of one Alleged Victim/Alleged Perpetrator/Maltreatment combination.

Region, as used in this Allegation and Maltreatment report - One of five areas of Alaska, based on the office of the OCS intake worker assigned at time of supervisory acceptance of the PSR screening decision.

Reporting Period - Complete month or calendar year, as specified in the report. Owing to Unique Counts, data reported on a monthly basis will not necessarily sum to annual figures.

Screened In / Screened Out - A decision as to whether the reporter's concerns within a PSR constitute a potential threat to child safety. If so, the PSR is Screened In and an Initial Assessment is completed. If not, the PSR is Screened Out and the Case is closed with no further action.

Unique Count - An unduplicated count within the Reporting Period; that is, each person, ID, or combination of person or ID with other factors is counted only once regardless of the number of times represented within the reported group during the Reporting Period. For example, an Alleged Victim of multiple instances of Neglect in the Anchorage region will be counted once in that Maltreatment type and region, though the same Alleged Victim may be counted again for other types of Maltreatment, or in other Regions. An Alleged Victim-Maltreatment-Region combination counted in multiple monthly reporting periods within a calendar year will be counted only once for that combination in a report based on calendar year.

Maltreatment Types

Mental Injury - An injury to the emotional well-being or intellectual or psychological capacity of a child, as evidenced by an observable and substantial impairment in the child's ability to function.

Neglect - Failure by a Caregiver to provide necessary food, care, clothing, shelter, medical attention, or education for a child.

Physical - Physical harm to a child is defined in AS 47.10.015 as conduct or conditions created by the Caregiver resulting in physical injury to, physical mistreatment of, or sexual contact with, the child. AS 47.10.015 also defines "substantial risk of physical harm" as a negligent act or omission by a child's Caregiver that creates a substantial risk of physical injury to the child.

Sexual - the child has suffered sexual abuse, or is at substantial risk of suffering sexual abuse, as a result of conduct by or conditions created by the child's Caregiver or by the failure of the Caregiver to supervise the child adequately. If the Caregiver has actual notice that a person has been convicted of a sex offense against a minor within the past 15 years, is registered or required to register as a sex offender, or is under investigation for a sex offense against a minor, and the Caregiver subsequently allows a child to be left with that person, this alone may constitute sufficient evidence that the child is at substantial risk of being sexually abused.
